

SHADE PERFECTION

Cordless, Rechargeable LED Shade Taking Light

Shade Taking
Perfection
\$99⁹⁹

NOW! There is no reason why you shouldn't have the proper light your operatories to select the correct shade.

PERFECT DENTISTRY DEMANDS
PERFECT SHADES.

The Shade Wand:

- Is a hand held cordless, rechargeable unit bringing the perfect light to the patient's mouth, where it belongs. Color correct ceiling lights are not as accurate because the light source is too far away from the patient's mouth.
- Eliminates ambient light variables such as wall colors, carpet, equipment, clothing, bibs, etc., which can affect shade selection.
- Will save you money by helping eliminate costly time and expense associated with remakes.
- Uses 5500 K LED which generates the perfect light for taking shades.
- Is lightweight and compact, and easily mounted to a wall, cabinet, or counter top.
- Is constructed with quality components to insure long life and consistent lighting.
- Is uniquely designed to provide the clinician the maximum amount of visibility.
- Measures 9 inches and comes complete ready to use.
- Includes a step-by-step procedure called "Shade Taking Made Easy".

Now! All Your Patients Can Have A Perfect Smile!
Competitors product selling at over \$700.00

How Can You Verify Adequate Occlusal Reduction?
use the

Occlusal Clearance Gauge

2.0 mm ball

1.5 mm ball

After tooth preparation, have the patient close and verify occlusal reduction.
If there is any interference, reduce more occlusally on the prep.
