Dentsply's Presentation:

Unleash the Power of Digital with Primescan™ DI

Why Primescan™ Intraoral Scanner? Intraoral scanners enable more accurate impressions and more efficient practice workflows leading to improved patient experiences and treatment outcomes.

- User Friendly FDA Approved Medical Device – safe, fast adoption for improved impressions for your clinic-to-lab workflows.
- Versatility – 2x higher stability for users enabling more efficient workflows for your digital impressions (oral health monitoring, sleep appliance, crown & bridge, clear aligner, implant, & removable).
- Accuracy – innovative Smart Pixel Sensor and dynamic depth of scan technology for perfect sharpness, it leads to fewer external remakes.
- Efficiency – with 98.8% lab acceptance rate, Primescan™ DI optimizes the various clinic-to-lab workflows, which can also lead to shorter turnaround times.
- Speed – 2x faster scanning speed (upper & lower impressions along with a bite registration in 60 seconds), image is directly sent to the lab without wait or lag time so any questions or concerns can be addressed before the patient leaves the chair.
- Seamless Integration – user uploads and transmits the 3D model securely and anonymized, if desired. The case information can then be accessed immediately via the Connect Case Center inbox.

Authentic's Presentation:

*Achieving Predictable, Clinical Outcomes Utilizing
Conventional & Digital Dentistry*

Course Objectives:

1. Learn the pros and cons between intraoral scanners vs. conventional impressions.
2. Learn the materials and techniques that will give you the best impression possible.
3. How does the CAD/CAM milling process improve quality and consistency while lowering remakes for better profitability?
4. Stop dealing with crowns that don't fit. Learn the techniques and materials to get perfect impressions.
5. How to end the #1 prep problem that labs see.
6. Learn why 92% of impressions have bad margins.
7. Now that you have done a great prep, learn your #1 enemy.
8. Despite trying several labs. Learn why your crowns still come back ugly.
9. Identify the problems associated with color and lighting and learn how to improve your shade-taking ability.
10. Learn the pearls associated with 38 years experience and over 1 million cases produced. Better dentistry, happier patients and more profitability.

Robert P. Marbach, BA, CDT

Mr. Marbach is the Founder of Authentic Dental Lab in San Antonio, TX. He is a Past Board of Directors at The Pankey Institute and is a Board Certified Dental Technician currently working on his Masters in dental technology with over 38 years of dental experience. Bob received his Technical Certificate of Completion from the Pankey Institute and is a past member of the Advisory Board for The Canadian Journal of Dental Technology. He is also a member of the prestigious TERC Group, a technical research consortium. Bob has lectured internationally for many years and his lecture has received approval from the Academy of General Dentistry. He has also received his Fellowship in the Academy of Dental Facial Esthetics and received the National Association of Dental Laboratories Inventor's Award for developing and patenting the "Shade Wand", a shade-taking light used by dentists worldwide. Most recently, he was inducted into the American Society For Advanced Dental Esthetics.
